

## Tile Updates in Firefly

In an effort to better assist users, a couple of tiles have been rearranged within Firefly. The SAPPHIRE (SAP help) tile is now located next to the SAP Logon tile. The Help, Support, and Feedback tiles, previously located at the bottom of the home page, are now accessible through the Firefly Essentials tile at the top of the home page. The SAP Security Request tile is now available from the home page.

The Feedback or Report a Problem tile now contains two additional options for submitting enhancements or data requests.

Request for Enhancement form provides a platform to submit an improvement for Firefly or SAP. To request certain data to run reports in BI, My Staff, or SAP, fill out the Request Data form.
