**Firefly Upgrade**

As of December 16, the Firefly business portal has undergone a redesign for all University and State College employees.

Aesthetic changes to Firefly include a new default theme and updated look of the tiles. The functionality of the tiles remains the same.

New features and functionality include:

- A search bar at the top of the home page.
- More filters in the left-hand navigation menu with a search bar to navigate within filters.
- Multiple user settings and options accessible from the User Menu include the ability to change the display theme.

To learn more about these new features, a resource guide is available in SAPPHIRE.
